SUMMARY

Passionate Full Stack Developer and 2nd year B.E. student in information Science and Engineering. Certified in MERN Stack and like working on real world projects.Currently i'm seeking internship opportunities to learn, explore and gain experience working with experienced developers.

PROJECTS

Zerodha Inspired Stock Trading Platform

MERN Stack | Chart.js | Vercel | Render

- I have built a full-stack fintech trading platform which has three core division Frontend,Backend and Dashboard.
- Implemented Authentication and Authorization so that only logged in users can access personal dashboard.
- Integrated stock charts using React Chart and Chart.js, Built wishlist and orders management functionality.
- I used Web Vitals to monitor and improve application performance.
- Deployed Frontend and Dashboard on Vercel,Backend on Render with Github integration.

Airbnb inspired Full Stack Web Application

MERN Stack | Cloudinary | Mapbox | Render

- In this project i have designed and managed a MongoDB database for storing users listing and data.
 - I implemented CRUD operations to manage listings and users for making it user friendly.
 - Implemented Authentication and Authorization with secure password handling including salting.
 - Integrated file uploads using Multer and Cloudinary for image management.
 - Added live map and geocoding features using Mapbox for location based listings.
 - Deployed the application on Render with Github integration.
-
